PROJECTS

A railway reservation system is an automated platform used for booking train tickets. It allows passengers to check the availability of seats, choose their preferred class, and reserve tickets for specific journeys. The system streamlines the booking process by providing real-time updates on train schedules and seat availability, reducing the need for manual ticketing. Passengers can make reservations online or through kiosks, ensuring convenience and efficiency. This system also supports cancellations and modifications, offering flexibility to travelers. Overall, it enhances the passenger experience by simplifying the reservation process and providing easy access to travel information.

COURSE CERITIFICATION

python full stack developer completed in IPCS global salem

HARD SKILL

FRONTEND

- HTML
- css
- javascript
- Bootstrap

BACKEND

- Python
- Django frameworks
- Mysql

SOFT SKILL

- Active Listening
- Team Collaboration
- Analytical Thinking
- Attention to Detail

TOOL/SOFTWARE

- version control - Git,Github
- ide   - visual studio code

GENERALSKILS

- Problem-Solving: Analytical thinking and the ability to approach problems methodically and find solutions.
- Critical Thinking: Ability to analyze situations, make informed decisions, and think logically.
